

Project 'Education for Citizenship Competence to Participation and Sustainability'

Third virtual meeting of the partners 30.09.2022, h.16 – 17,15 lt. time

Minutes

Participants:

ES - Lidia Santana Vega, Olga González Morales, Milena Trenta

IT – Olga Bombardelli, Elena Fazi, Laura Simeon

RO – Iulia Coman, Tony Nicolae, Antonia Damian.

The following items are discussed

1. Meetings in presence in Rome– 17-18 November 2022

Attendance – at the moment, 1 person is sure from ES, 2 from RO, 5 from I are expected;

Agenda – all items of the Kick off meeting will be considered during the meeting in Rome, especially the Toolkit, the Guidelines and the Webinar for teachers, which includes instructions for the Course with the students etc. Participant partners will have the opportunity of visiting a cooperating school too.

For the QA, the reporting of the performed activities (with supportive documentation) will be shared in advance.

2. Toolkit – The first drafts are available and the structure is discussed: there will be 'core texts' and larger texts, the contents will be organised in 'what', 'who', 'when', 'why' etc.. Partners will work hard on the in the next weeks.

3. Webinar of the teachers - The coordinator describes the internal activity for the 'webinar of the teachers', to be discussed. The planning is published on the Italian part of the Project website. The timing of the first activities of the webinar is between the end of the meeting in Rome and the Christmas time, in order that the teachers are able to put in practice the 'Course with the students' in spring 2023. The international part will be in English; in case that it is needed, there can be a replay in the national language. The Toolkit (draft) must be ready in advance. The LTTA has to involve at least 10 teachers (from at least 3 schools/centres) from every partner country. The records of the teaching activities to be observed at transnational level will be undertitled to facilitate the understanding and the cooperation among the partners.

4. Dissemination – The Newsletter (s. Gantt chart) will inform internal participants and external publicum about the Project work and the Multiplier events. Important is the information of all possible interested people and groups (*mailing list*), for the lifetime of the Project and for the exploitation.

5. Partners analyze the 'Template of the submitted materials' (linked to the performed activities), shared via e mail before the meeting.

All partners care both for the Project central website (translations in the national languages, information, scientific references) and for the publication of the Project ECCOPS on the own institutional website. Scientific articles should be developed too.

6. Partners discuss about the working language of the project and Spanish is welcome. In the Partner Agreement, English is considered the official language, but Spanish will have an important role. It is helpful and highly appreciated that some members of the Romanian team have a fluent Spanish.

October, 4th 2022.

Olga Bombardelli
